

## CLOUD ASSESSMENT SERVICES

Cyberlocke's innovative cloud strategy substantially minimizes the difficulties in effectively handling the dynamic requirements of your cloud infrastructure. We possess a profound comprehension of the intricacies and challenges inherent in crafting and maintaining cloud ecosystems, and we have a well-devised strategy to provide assistance.

The cloud evaluation will determine whether your existing cloud infrastructure was designed and deployed correctly, offering suggestions for enhancing the environment to cater to your business needs and user requirements more effectively.

Employing the four core principles of the evaluation, our specialists guarantee that the essential cornerstones of your cloud ecosystem are structured to uphold scalability, adaptability, governance, and safety.

## STRATEGIC ROADMAP & RECOMMENDATIONS

The cloud evaluation generates a performance evaluation and suggests enhancements to more closely align your distinct cloud setup with industry best practices. Utilizing Cyberlocke's distinctive cloud methodology, the design suggestions incorporate relevant existing technologies to capitalize on current investments, while also highlighting adjustments where necessary to enhance capabilities. A strategic roadmap becomes a valuable asset for both you and your business, guiding the implementation of changes in upcoming workstreams.

## MATURITY GAP ANALYSIS

The maturity assessment employs more than 40 data points to quantify deviations from optimal best practices concerning security, operations, dependability, performance, and cost efficiency. The evaluation for each category aids in comprehending your current position in relation to best practices, empowering you to strategically prioritize remedial actions where necessary.

## GOVERNANCE

Numerous cloud ecosystems encounter challenges in meeting audit prerequisites linked to resource utilization, accessibility, cost management, and administration, in addition to conventional concerns such as security and regulatory adherence. We provide support by harmonizing your governance with defined benchmarks that are closely aligned with optimal methodologies, effectively tackling the intricacies of infrastructure oversight, regardless of the cloud platform. This equips your team to fulfill audit and compliance demands effectively.

## RESOURCE & COST SEGMENTATION

Devising your cloud ecosystem while harnessing top-tier methods for workload segregation, achieved through the utilization of several distinct accounts or subscriptions, demands a well-thought-out segmentation strategy. Developing tailor-made configurations for accounts and subscriptions will furnish your cloud environment with the capacity to enhance cost oversight, streamline billing procedures, and facilitate chargeback functionalities. The assessment's segmentation aspect will furnish valuable perspectives on the arrangement and blueprint most apt for bolstering your organization's needs.

We have a plan to help your organization design and implement innovative cloud solutions to grow faster, minimize costs, and operate your business efficiently and securely.
